

For Immediate Release

Industrial Cranes From Morris Material Handling Are Affordable and Include Fast Delivery

OAKCREEK, WI (December 31, 2008)—Morris Material Handling, the original equipment manufacturer of P&H® cranes, hoists, and replacement parts, introduces a custom-built solution using standard components for material handling applications. Industrial cranes provide design flexibility at an affordable price with fast delivery.

Built to CMAA design specifications, industrial cranes and components from Morris Material Handling are equipped to handle loads of up to 100 tons and span up to 100 feet. Regional manufacturing ensures expedited delivery and contributes to competitive pricing with reduced freight costs, while upholding the reliable P&H® quality and service.

Morris Material Handling can customize industrial cranes and components to fit the needs of the application, and the high-quality products remain competitively priced. Options for cranes and components are paired for specific requirements and adjusted according to budget. Morris Material Handling offers a complete line of floor, and remote controlled, standardized industrial overhead cranes, with two speed through adjustable frequency options. Customization options include a wide selection of drives, end trucks, and hoists, as well as optional girder connections to meet the clearance requirements and below the hook devices to match specific lifting needs.

Industrial crane components offer several enhanced features, including: a completely enclosed bridge and trolley drive gearing to ensure a cleaner work environment and extend gear life in dirty environments; a heavy-duty hoist which increases efficiency and decreases maintenance; a heavy-duty cast iron rope guide with a half depth grooved drum to extend rope life and provide damage resistance; and upper (block actuated) and redundant geared type lower hoist travel limit switches for improved safety.

Morris Material Handling is the original equipment manufacturer of genuine P&H® cranes, hoists, and replacement parts. The quality reputation is derived from an installed base of over 100,000 overhead cranes and hoists supplied to customers with various lifting needs in industrial applications. As a part of one of the largest overhead crane manufacturers and distributors in the world, Morris Material Handling has access to a line of mass produced competitive components.

To find out more about the industrial cranes and components, contact Morris Material Handling, 315 W. Forest Hill Avenue, Oak Creek, WI 53154 or call 866.261.9975. For the nearest Service center anywhere in North America, call 800-933-3001 or visit www.morriscranes.com.

About Morris Material Handling

Morris Material Handling is a world-class supplier of overhead cranes and maintenance services, and the original equipment manufacturer of P&H® Cranes, Hoists, and Replacement Parts. Headquarters are in Wisconsin, where the original company was founded in 1884. The company serves customers in the U.S., Canada, Mexico, and Chile, with over 1,000 employees in multiple service and manufacturing locations. Their on-going commitment is to improve safety, productivity, and return on investment over the entire life-cycle of its customers' operations.
