

# SLIDER SEAT UPGRADE

Bulletin no. 13505

New: June 28, 2002

Rev. 0

Fixed/tilting consoles allow maximum adjustability

- Slider base replaces rotate bearing on your existing cab seat.

- Heavy Duty slider design

Slider with seat back.  
Note adjustment pin locks.

- Full replacement package includes seat, side consoles and slider base. As an option, the existing seat and side consoles can be reused without the rotate on the slider base, for cost savings. We can even reuse your side consoles.

- Eliminates the rotate bearing and the “wobble” associated operator fatigue problems

## FEATURES

- Upgrade your existing cab
- Eliminate rotation wobble
- Fixed or attached consoles
- Fully adjustable seat
- Fully reclining seat back
- Heavy Duty slider assembly
- Get closer to the window area
- Recommended by experienced crane operators
- New or reuse masters/electrics
- Eliminates wires through the center bearing hole.

## BENEFITS

- Reduced operator fatigue
- Increased efficiency
- Improved back and arm comfort
- Seat fits all size operators
- EMT's can treat an operator while in the seat.
- Greater reliability
